PROJECTS

NexaBot – AI ChatBot ↗

Streamlit, Groq API

[Live ↗](#)

- Built an AI-powered chatbot using Streamlit and Groq LLM API, leveraging large language models for context-aware conversational responses.
- Developed an interactive chat interface with responsive UI components, improving usability and delivering a ChatGPT-like user experience.

AlgoVault – DSA Tracker ↗

MongoDB, Next.js

[Live ↗](#)

- Built a full-stack DSA tracking platform using Next.js and MongoDB to log problems from LeetCode, GFG, and various others with custom tags and notes.
- Designed a persistent data layer with MongoDB to preserve problem state, tags, and notes reliably across sessions.
- Implemented user authentication (login/signup) and a dashboard to visualize solved, unsolved, and revision-tagged problems at a glance.

SkyPulse – Real-Time Weather App ↗

Next.js, API calls

[Live ↗](#)

- Developed a high-performance weather web app using Next.js, utilizing server-side rendering and API integration for efficient real-time data retrieval.
- Designed modular, reusable components with responsive UI, incorporating city-based search, conditional rendering, and optimized client-server data flow.
